.....

I am aware of the fact that according to the internal rules and regulations of the school as well as its policies and procedures, attendance at the primary school does not create an obligation for the school to accept the child at the elementary school.

The Montessori approach being the best proposal for the children's education is considered as a necessary prerequisite for the attendance of the child in the elementary school. Emphasis is given on the internal motivation that each child can display as well as his/her initiative and self-organisation ability that will allow him/her to be substantially benefitted from environment of free choice of work.
